SUMMARY

Creative and detail-oriented Web Developer with a strong foundation in HTML, CSS, JavaScript, Bootstrap, Tailwind CSS, and React.js for frontend development, and PHP/Laravel, Node.js, Express.js and MongoDB for backend solutions. Dedicated to crafting responsive, intuitive, and visually appealing websites and applications that deliver real value to users. Eager to apply technical expertise and a problem-solving mindset to build innovative digital experiences that make a positive impact.

EXPERIENCE

03/2025 - Present

Kabul, Afghanistan

Full Stack Developer

Online Classifieds marketplace Web App for second hand items

Developing a full-stack classifieds marketplace using React.js, Tailwind CSS, and Laravel, featuring:

- Built a full-stack classifieds platform for buying and selling second-hand items using React.js, Tailwind CSS, and Laravel.
- Designed a dynamic category & subcategory system with admin-defined custom attributes, enabling flexible ad posting across multiple product types.
- Implemented ad management dashboard with create, update, delete, and status controls for streamlined moderation.
- Developed a scroll-synced Ad Details page with sticky tab navigation (Details, Description, Specifications) and smooth animations.
- Integrated advanced image viewer with zoom, thumbnails, and fullscreen support to enhance buyer experience.
- Engineered a location system with city-based selection and detailed address input, ensuring accurate ad placement.
- Implemented real-time chat system using Laravel Echo & WebSockets for instant buyer-seller messaging, improving engagement and reducing response time by 50%.
- RESTful API integration with Laravel backend for secure data handling.
- Designed a responsive, mobile-first UI with Tailwind CSS, ensuring seamless cross-device experience.

01/2025 - 02/2025

Kabul, Afghanistan

Front End Developer

Personal project: Movie Search & Rating App (React.js + API)

Developing a searching movie project using React.js, and API, featuring are:

- Built a movie search application in React.js using the **usePopcorn** API to fetch real-time movie data.
- Implemented search functionality to find movies by title and display detailed information.
- Added a favorites list feature, allowing users to save and manage their favorite movies.
- Integrated a custom star rating system (1-10) so users can rate movies directly in the app.
- Designed a responsive, mobile-friendly UI with Tailwind CSS for a smooth user experience.
- Used React hooks and state management to handle API calls, loading states, and user interactions efficiently.

05/2024 - 06/2024

Kabul, Afghanistan

Laravel Developer

Monograph management system for undergraduate students (Personal project)

Developing a complete monograph management system for undergraduate students

- Built a role-based MIS system in Laravel for students, teachers, and administrators.
- Implemented secure student-teacher assignment workflow, allowing students to choose a supervisor and submit final monographs.
- Developed a teacher dashboard to review, accept, or reject submissions with feedback.
- Created an admin panel for managing users, monographs, and system settings.
- Integrated authentication, access control, and file upload handling for large PDF monographs.
- Ensured clean database structure in MySQL for efficient querying and reporting.
