Kabul, Afghanistan

### SUMMARY

Creative and detail-oriented Web Developer with a strong foundation in HTML, CSS, JavaScript, Bootstrap, Tailwind CSS, and React.js for frontend development, and PHP/Laravel, Node.js, Express.js and MongoDB for backend solutions. Dedicated to crafting responsive, intuitive, and visually appealing websites and applications that deliver real value to users. Eager to apply technical expertise and a problem-solving mindset to build innovative digital experiences that make a positive impact.

### EXPERIENCE

#### 03/2025 - Present

Kabul, Afghanistan

#### Full Stack Developer

##### Online Classifieds marketplace Web App for second hand items

Developing a full-stack classifieds marketplace using React.js, Tailwind CSS, and Laravel, featuring:

- User authentication, ad posting, and real-time chat.
- Real-time chat system (Laravel WebSockets) for seamless buyer-seller communication, reducing response time by 50%.
- Responsive UI with Tailwind CSS for mobile-first design.
- RESTful API integration with Laravel backend for secure data handling.
- Optimizing performance, achieving ~2s page load times via code-splitting and caching.

#### 01/2025 - 02/2025

Kabul, Afghanistan

#### Front End Developer

##### Person project: Movie Search & Rating App (React.js + API)

Developing a searching movie project using React.js, and api, featuring are:

- Built a movie search application in React.js using the **usePopcorn** API to fetch real-time movie data.
- Implemented search functionality to find movies by title and display detailed information.
- Added a favorites list feature, allowing users to save and manage their favorite movies.
- Integrated a custom star rating system (1-10) so users can rate movies directly in the app.
- Designed a responsive, mobile-friendly UI with Tailwind CSS for a smooth user experience.
- Used React hooks and state management to handle API calls, loading states, and user interactions efficiently.

#### 05/2024 - 06/2024

Kabul, Afghanistan

#### Laravel Developer

##### Monograph management system for undergraduate students (Personal project)

Developing a complete monograph management system for undergraduate students

- Built a role-based MIS system in Laravel for students, teachers, and administrators.
- Implemented secure student-teacher assignment workflow, allowing students to choose a supervisor and submit final monographs.
- Developed a teacher dashboard to review, accept, or reject submissions with feedback.
- Created an admin panel for managing users, monographs, and system settings.
- Integrated authentication, access control, and file upload handling for large PDF monographs.
- Ensured clean database structure in MySQL for efficient querying and reporting.

### EDUCATION

#### 03/2021 - Present

Kabul, Afghanistan

#### Bachelor of Science in Computer Science(Information Systems Department)

##### Kabul Polytechnic University

#### 2014 - 2017

Ghazni City, Afghanistan

#### English Language Certification

##### Ayandagan English Language School

#### 03/2008 - 10/2020

Ghazni City, Afghanistan

#### High School Diploma (General Education)

##### Qala-e-Shahada High School

### TICHNICAL AND SOFT SKILLS

HTML5	CSS3	JavaScript	Bootstrap	Tailwind CSS	React JS	My SQL	PHP	Laravel	Node js
express js	mongo DB	Team Working	Git	Github	Visual Studio	Communication			
Teamwork & Collaboration	Adaptability	Problem-Solving	User-Centered Thinking	Attention to Detail
