SUMMARY

Recent Computer Science graduate and passionate Web Developer with hands-on experience in modern frontend technologies — including React.js, TypeScript, and Tailwind CSS — and backend development using Node.js, Express.js, MongoDB, and PHP/Laravel. Eager to contribute to real-world projects , I bring strong problem-solving skills, attention to detail, and a collaborative mindset. Proficient in Git/GitHub and familiar with Agile/Scrum workflows, I'm excited to learn from experienced developers, grow through mentorship, and help build scalable, user-focused applications. Fluent in English and Dari/Pashto, I'm ready to bring energy, curiosity, and technical skill to your development team — whether you're a startup, agency, or enterprise.

EXPERIENCE AND PROJECTS

08/2025 - 09/2025

Kabul, Afghanistan

Full Stack Developer

E-commerce Web Application (MERN + Redux)

Developing a full-featured e-commerce platform using the MERN stack (MongoDB, Express.js, React.js, Node.js).
- Implemented Redux for efficient state management, handling cart, authentication, and product data flow seamlessly.
- Product catalog with search, filtering, sorting, and pagination for better user experience.
- Secure authentication and authorization with JWT-based login and role-based access control.
- Shopping cart, checkout flow, and order management system with real-time updates.
- Optimized frontend performance with React hooks, code-splitting, and lazy loading.
- Responsive design with Tailwind CSS ensuring smooth user experience across all devices.
- Planned deployment with scalability and API-first design for easy integration with future features

04/2025 - 08/2025

Kabul, Afghanistan

Full Stack Developer

Online Classifieds marketplace Web App for second hand items

Developing a full-stack classifieds marketplace using React.js, Tailwind CSS, and Laravel, featuring:
- Designed and developed a fully responsive frontend in React.js and Tailwind CSS, optimized for both desktop and mobile devices.Designed and developed a fully responsive frontend in React.js and Tailwind CSS, optimized for both desktop and mobile devices..
- Applied React Context API for state management, ensuring smooth handling of authentication, listings, and chat states across the app.
- Delivered optimized performance with code-splitting, caching, and lazy loading to ensure fast page loads and smooth navigation.
- Implemented flexible database architecture in Laravel 12 with MySQL to support scalable categories, subcategories, and city-based listingsDeveloped a scroll-synced Ad Details page with sticky tab navigation (Details, Description, Specifications) and smooth animations.
- Developed a fully dynamic classifieds platform inspired by Divar and Quikr, enabling users to buy and sell second-hand items.
- Built dual dashboards: an admin dashboard for managing users, ads, and reports, and a user dashboard for posting and managing listings.
- Integrated secure authentication, ad posting workflow, and user verification via OTP.

01/2025 - 02/2025

Kabul, Afghanistan

Front End Developer

Personal project: Movie Search & Rating App (React.js + API)

Developing a searching movie project using React.js, and api, featuring are:
- Built a movie search application in React.js using the **usePopcorn** API to fetch real-time movie data.
- Implemented search functionality to find movies by title and display detailed information.
- Added a favorites list feature, allowing users to save and manage their favorite movies.
- Integrated a custom star rating system (1–10) so users can rate movies directly in the app.
- Designed a responsive, mobile-friendly UI with Tailwind CSS for a smooth user experience.
- Used React hooks and state management to handle API calls, loading states, and user interactions efficiently.

05/2024 - 06/2024

Kabul, Afghanistan

Laravel Developer

Monograph management system for undergraduate students (Personal project)

Developing a complete monograph management system for undergraduate students
- Built a role-based MIS system in Laravel for students, teachers, and administrators.
- Implemented secure student–teacher assignment workflow, allowing students to choose a supervisor and submit final monographs.
- Developed a teacher dashboard to review, accept, or reject submissions with feedback.
- Created an admin panel for managing users, monographs, and system settings.
- Integrated authentication, access control, and file upload handling for large PDF monographs.
- Ensured clean database structure in MySQL for efficient querying and reporting.

EDUCATION

04/2021 - 09/2025
Kabul, Afghanistan

● Bachelor of Science in Computer Science(Information Systems Department)
Kabul Polytechnic University

2014 - 2017
Ghazni City, Afghanistan

● English Language Certification
Ayandagan English Language School

03/2008 - 10/2020
Ghazni City, Afghanistan

● High School Diploma (General Education)
Qala-e-Shahada High School

TICHNICAL AND SOFT SKILLS
